New Councillors Take Their Seats

TOWN DADDIES' WORK FOR CURRENT YEAR SET IN COMMITTEE

The first regular meeting of the Town Council after the general elections in 1934 was held on Monday, February 19th, 1934, pursuant to notice.

The members of Council present at this meeting were Mayor Foster, and Councillors Adams, McLeod, Billing, Welch, Courser and Link.

The report of the returning officer on the result of the election was submitted to Council and, on motion, was filed.

The newly elected councillors, having subscribed to the prescribed declaration, were allowed to take their seats.

The recorded proceedings of Council at its regular meeting of February 6th, 1934 were read and, on motion, were adopted and confirmed as written.

On motion the Council resolved itself into a committee of the whole for the purpose of striking the standing committees of Council for the current year with Councillor Courser in the chair.

On rising, the committee of the whole reported, recommending that the standing committees for the year 1934 be constituted as follows:

Finance Committee
Councillors Link, Welch and Adams.

Public Works Committee
Councillors Courser, Link and Billing.

Fire, Light and Utilities
Councillors Adams, Courser and McLeod.

Assessment, Property and By-laws
Councillors Billing, McLeod and Courser.

Parks and Cemetery Committee
Councillors McLeod, Adams and Welch.

Public Health Committee
Councillors Welch, Billing and Link.

The first named gentleman being the chairman in each instance.

Police Committee
Mayor Foster, chairman, with other members.

Link Committee
The whole Council.

On motion, the report of the committee of the whole was accepted and incorporated in the proceedings of the meeting.

On motion, Council was adjourned to resume deliberations at 8 o'clock p.m. on Tuesday, the 27th day of February, 1934.

The adjourned regular meeting of the Town Council was held on Tuesday, February 27th, pursuant to the motion of adjournment.

The members of Council present at this meeting were Mayor Foster and Councillors Billing, Adams, Welch, McLeod, Courser and Link.

The requisition of the Wainwright Municipal Hospital for \$1500.00 for the year 1934 was presented in a communication from Mr. J. W. Stuart, secretary-treasurer, and, on motion, the requisition was filed pending the compiling of estimates for the current year.

An application for increase in the amount of mothers' allowance being paid to Mrs. Daisy Tansley, was laid before Council in a communication from Mrs. Tansley and also a communication from the department of child welfare for the province of Alberta and, on motion, the matter was referred to the secretary-treasurer for further information.

Messrs. Miles, Mabey and Harry Myer wrote Council requesting the

privilege of the use of the agricultural grounds for the staging of a stampede on the 2nd and 3rd of July in the years 1934-35-36 and, on motion, the communication was referred to a committee, consisting of Councillors Billing, Link and Welch, for consideration and report.

An account from Dr. H. C. Wallace for an operation performed on the infant son of Mr. W. W. Little was presented to Council and, on motion, this account was referred to the Town Solicitor for advice as to the legal obligation of the town.

On motion, the Secretary-Treasurer was instructed to communicate with the proper authority with the Canadian National Railways with a view of obtaining a quantity of gravel from the Kinleith pit for use in improving the streets of the town.

On motion, the matter of the registration of dogs within the Town of Wainwright with the payment of fees therefor was placed in the hands of the committee on Assessment, Property and By-Laws for enforcement and report.

On motion, the regular communications of Council was set for 8 o'clock p.m. on the first and third Tuesdays of each month of the current year, all meetings to be held in the council chamber of the town.

On motion, the tender of Mr. H. C. Link, submitted at the regular meeting of February 6th, 1934 and laid on the table, for the lease of lots 9 and 10 in block 18 Plan V for \$10 for the year, was accepted, Councillor Link refraining from voting on this motion.

On motion, Council was regularly adjourned.

Arsene Lupin At The Elite This Week

The feature comedy-drama showing at Elite Theatre this week commencing Thursday, March 8th, Sel. dom will you hear the "Oh" and "Ah" of joy as will be loose during the showing of the extra funny Metro-Goldwyn comedy-drama. It is a great comedy, and it is a pretty fashion seeing that she is just a youngster playing against two seasoned troopers. The laughs are plenty, the thrills are many and the love scenes are smartly sophisticated with that old touch that only John Barrymore knows how to work up.

The story is a record of the attempts of Lionel Barrymore to arrest John Barrymore, a famous silk-hatted crook, which results always in failure for John is to slick and Lionel too simple minded. Lionel eventually succeeds in capturing him. By this time, John had fallen in love with Karen Morley, a crook, employed by Lionel to help him catch John, and Karen had fallen in love with John. Since Karen's freedom was in danger, Jack has to put handcuffs on him and pretend that she had captured him. Jack, however, has Lionel's daughter abducted and succeeds in bargaining for the freedom of his men, whom the police had arrested, although he is unable to make Lionel let him free too. Lionel, however, while taking Jack to the police station, points out the river to him while they were crossing the bridge and informs him that once a prisoner had escaped from his hands in that very spot.

LOCAL NOTES

On Tuesday Mr. Schlitt was taken to hospital and operated on for appendicitis and last report is that he is doing fine. We wish him a speedy recovery.

Howard Renville is now employed at the Rudd and Patterson store filling the vacancy made by Percy Wilkins who is in hospital.

Mr. Phil Rajotte had his hand injured while loading cattle at the Charter sale at Greenhills last week. It is going along all right now.

Miss Ione Plaxton will do a week of practice teaching at Easter time in the Mayfield school, while Mr. Donald Gunn has been assigned to the Fabryan school.

Mrs. W. Prosser was paying a visit to her daughter in Edmonton last week for a day or so.

We are sorry to learn that Mr. Art. Patterson of Greenhills is suffering from a bad face cut which he sustained when a bar fell and struck him beside the nose last week.

The N. I. club had a very pleasant evening on Monday when they staged a surprise party for Mrs. L. Stott on the occasion of that lady's birthday anniversary.

Mr. Wm. Parcels of Chauvin was in town over the week end.

Annual Meeting Of Wain. Presbytery

On Tuesday of last week, the annual meeting of the Wainwright presbytery of the W.M.S. of the United church met in the United church at Tofield, when quite a large number were present representing the different auxiliaries. The following are some of the high-lights of the gathering.

Mrs. Reeds, of Irma, gave a very fine address asking the members to do their very best to carry on the work; her text was "Go ye into all the world and preach the gospel."

Mrs. Langerquist, of Ryley, (who was a missionary in China for 37 years) gave a splendid address on "Stewardship and Worship," which was much enjoyed by all. This was followed by an impressive memorial service conducted in honor of the late Mrs. Thomas, who was last year's secretary of the organization.

Mrs. Washburn, Mrs. Lyle, Mrs. Hackett, Mrs. Bosworth, Mrs. McCauley, Mrs. Reeds and Mrs. Steel took part in this service, and the president in a few appropriate words paid a glowing tribute to our departed sister, following which she lifted a lighted candle from the table and on it lighted the candles held by the other officers, who each as her candle was lighted quoted an appropriate verse of scripture. These seven officers standing in a row with their lighted candles in hand turned and faced the congregation, who

LOCAL NOTES

On Monday at the hospital Miss Dorothy Wilkins was operated upon for an attack of appendicitis, and we wish her speedy recovery.

Miss Lexie Morrison left on Monday's train for Edmonton where she will act as delegate for the local lodge of Rebekahs this week.

Mrs. L. Stott went to the city last week and owing to the fact that her mother (a former resident here) underwent an operation in a city hospital.

Then rose and joined in repeating the slogan as a prayer which the late Mrs. Thomas had adopted as hers, viz: "Almighty God set us aflame to show the glory of Thy name."

Mrs. Washburn gave a very inspiring address on "Candles of the Lord or the Inner Flame of the Spirit," this being followed by a beautiful solo by Mrs. Tofield, the words being appropriate to the memorial service.

Mrs. Dr. Miller, of Edmonton, gave a splendid talk on "Realizing God through the normal."

This ended one of the best presbytery gatherings yet held, and I am sure everyone who was there went away resolved to work harder than ever to help along the Kingdom of God in the foreign field.

Mary H. Steel, Secretary, Wainwright, branch.

Double Wedding Of Local Young Folks

HEATH

A birthday party in honor of Clinton Davis was held on Friday evening last at the home of Mr. George Davis. A pleasant evening was spent at games and dancing followed by a delicious lunch served by Mrs. Davis and J. Logan. Among those present were Miss Mary Brown, J. Logan, Gladys Mockford, Olga Bartlett, Mr. Fred Mockford, Clinton Davis, Frank Patterson, Bobbie Herbert and Adeline Touchette.

Mr. Magnus was the speaker at Heath Mission church on Sunday afternoon.

To the fine old strains of the march from the "Bridal Chorus" by Loehring, played by Mr. W. Carrell, the bridal procession entered the church by different doors and joined the grooms at the altar, there to be united in holy wedlock by the pastor, the Rev. W. S. Brooks. During the ceremony and while the contracting parties signed the register, Mrs. Fred Sheffield beautifully rendered "O Promise Me" and "I Love You Truly."

Mrs. Woodger is the youngest daughter of Mr. and Mrs. Alfred Lilly, sr., of Wainwright. She was given in marriage by her father and her brother Mr. A. Lilly, jr., acted as best man. Miss Ethel Brown made a sweet bridesmaid in her costume of blue. The two little flower girls, Miss Ellen Graham and Miss Phyllis Montgomery, were prettily clad in dainty white dresses.

Mrs. Lilly, jr., daughter of Mrs. Harkness, of Wainwright, was given away by her brother, Mr. David McGowan, and had as her bridesmaid her sister, Miss Jean Harkness, who wore a dress of mauve satin. Her two flower girls, the Misses Cathie and Annie Wylie, were wearing dresses of peach silk. Mr. Fred Sheffield acted as best man for Mr. Woodger.

After the ceremony nearly sixty guests assembled in the I.O.O.F. hall to attend the dinner given in honor of the bridal couple. The long tables had been beautifully decorated by Mrs. G. Graham, and a wedding cake adorned the head of each table, vases of roses and cut flowers being interspersed. After the bounteous spread had been done full justice to, the toast list was given by Mr. J. Hill.

At 7.30 with the crowd augmented by other well-wishers, dancing commenced to the strains of one of the town orchestras and at midnight lunch was served, when Mr. Graham proved himself an expert coffee-maker.

During the proceedings both brides were presented with a rolling pin apiece, and a number of musical items were delightfully rendered by Mr. J. Hill, Mr. F. Poynton, Mrs. F. J. Wylie, Mrs. Fred Sheffield and Mrs. W. Carrell.

Mr. and Mrs. Woodger will reside on the groom's farm at Heath, while Mr. and Mrs. Lilly will take up their residence here in Wainwright.—Con.

Congratulations and best wishes for a long and happy married life to the happy young participants.

**MISSIONARY SOCIETY
ALBERTA CONFERENCE**

The annual meeting of the Alberta Conference Branch of the United Church Women's Missionary Society is being held in McDougall Church, Edmonton, March 6th to 9th this week. All are cordially invited to attend these meetings.

16 Rinks Entered In Spiel; Stuart Wins Grand Challenge

Ruttan of Hardisty Wins Edmonton Brewing Cup

The Grand Challenge, premier event of the bonspiel was brought to a conclusion on Monday night when Stuart and Washburn went to the mat in a struggle for the coveted honor. Both rinks were very popular and it was not till the last rock had been delivered that anyone could be sure of the result. Stuart finally won out but had he not been able to connect with his last rock, Washburn had a good chance to win.

At the end of the tenth Stuart was three up, and on the eleventh Washburn had a beautiful chance to take out the short rock and lay four but his shot was narrow and Stuart counted one; this putting Stuart four up coming home an old looked like a cinch.

Washburn managed to get the necessary four to tie the game by the time Stuart came to throw his last stone. Stuart came down to the short rock but only moved it back about two feet and Washburn had an open chance to kick Stuart out and lay five but his shot went wide and there was nothing left but the cheer-

ing. There are still four games to be played in the consolation event. Forbes and Fish play to get into the fours. Hedlund, McBride and Mills are already in the jewelry in this event and the 1934 spiel will likely be wound up tonight (Tuesday).

There were 16 rinks in all entered in the bonspiel and of these five were out of town. The visiting rinks are as follows:

Ruttan of Hardisty
Pawsey of Edmonton
Parcels of Chauvin
Hedlund of Heath

The full list of the awards in the various competitions is as follows:

GRAND CHALLENGE TROPHY
(Maryland Hotel Cup)
Don. by Messrs. McDonald & Noble
Four quarters Buffalo Beef donated by Buffalo National Park, 1st; Four Carving Sets, donated by W. E. Washburn, 2nd; Four Sigsal Cans Motor Oil, donated by Messrs. Tofield, Guthrie, Agnew and Salisbury, 3rd;

First Meeting Of New Hospital Board

The first meeting of the 1934 Hospital Board met on Friday last when the whole Board were in attendance, with Secretary Stuart.

It is particularly requested to draw attention to a motion passed at the February meeting of the Board in that the sum of \$25.00 be accepted on the Mrs. E. N. Arthur account in full settlement of the balance of the amount then owing.

The newly elected members of the Board, Dr. S. E. Wiley and Mr. O. J. Gould, having taken their oath of office, the minutes of the previous meetings were then read and adopted on a motion by Trustee Gardner.

Moved by Trustee Santee—That Trustee Wiley be chairman of the Board for 1934.—Carried.

Moved by Trustee Gould—That Gardner be vice-chairman for 1934.—Carried.

Moved by Trustee Santee—That a House Committee be appointed to act in cases of emergency between meetings in regard to the operating of the hospital, but that all matters of importance be left to be dealt with by the whole Board.—Carried.

Moved by Trustee Gould—That Trustees Wiley, Sutherland and Santee be the House Committee for 1934.—Carried.

Moved by Trustee Gardner—That Mr. J. W. Stuart be retained as secretary-treasurer at a salary of \$25 per month.—Carried.

Moved by Trustee Gardner—That (Continued on page 8)

Our Parliamentary Ottawa News Service

(Special to the Star)

The bill to revise the Bank Act, anticipated with such deep interest in its decennial appearance, was overshadowed this session by its twin, a bill to create a central bank. In presenting this latter bill the Minister, Mr. Rhodes, made a brief explanation of its functions and main features, the details of which are comprised in forty-three clauses covering nineteen Hansard-sized pages.

The new institution has been named "The Bank of Canada," and it is not to be regarded as a competitor of our chartered banks, said Mr. Rhodes. "Its functions are intended to be supplementary and regulatory, and are as follows: to regulate internal credit and foreign exchange; to mitigate fluctuations

in the level of production, trade, employment and prices as far as may be possible within the scope of its monetary and fiscal, and to give expert and impartial financial advice to the government of the day." The bill provides for private ownership, but is hedged round with restrictions designed to preserve the possibilities of control detrimental to the public interest.

"The Bank of Canada, though privately owned, will operate as a public trust," declared the Minister. "Profits are definitely limited to six per cent on a small capital. It is intended that the bank shall have eventually sole right of note issue. Against its notes and deposits a reserve of at least twenty-five per cent is to be held. The legal reserves of the chartered banks will in future be

(Continued on page four)

What's New?

FRANCE . . . has grafters
I find a certain patriotic official graft and corruption in France. It proves, what I have often said, that political crookedness is not solely an American trait. Some of my friends would have me believe that everything European is better than anything American. My observation is that human nature is the same all over the world, and that given the opportunity to get away with it, men will use their own political offices to feather their own nests at public expense can be found anywhere.

French politics has always been corrupt. This time it looks as if the gang which has been in power for years was through. Some of my Paris correspondents are greatly alarmed; they predict another revolution in France.

TUT . . . no cure
Superstitions are hard to kill. Humanity is credulous because most of us want to believe in something we can't explain. The story that has been going the rounds for several years about the curse laid by the Egyptian Pharaoh, Tut-Ankh-Amen, upon whomever might despoil his tomb, I have heard seriously discussed by otherwise intelligent people, who informed me gravely that every one, or nearly every one, of the members of the expedition which found treasure in that ancient tomb a few years ago had since died a mysterious death.

A check-up by Director Winlock of the Metropolitan Museum of Art proves that out of the forty persons present when King Tut's mummy was unwrapped, thirty-five are still alive and in good health, after ten years. The seven who died lived to an average of sixty.

That doesn't sound as if Tut's curse had been very effective, but I imagine foolish people will continue to repeat the original tale for generations. It is more interesting than the truth.

WHEELS . . . source of grief
I have a good deal of sympathy with the poet, of view of Tarchin Baboo of Kalimpong. Tarchin is editor of the monthly newspaper, the only paper published in Tibet, the title of which translated into English means: "The Mirror of the New Vicissitudes of Every Corner of this Universe."

In his latest issue the editor, sitting on the roof of the world in the high Himalayas, looks around and discovers what is the matter with the rest of us. It is wheels. Abolish wheels and there would be jobs for everybody, he thinks. By the use of wheels, he points out, the uncivilized world outside of Tibet has made it possible for two men to do the work that takes a thousand in Tibet.

As I said, I have a good deal of sympathy for the idea that we have

les machines do too much for us, and have got out of the habit of doing things for ourselves.

FIORELLA . . . on his way
I want to give Major Fiorella La Guardia another pat on the back. He has taken hold of his big job as Mayor of New York City with such vigor and determination that it looks as if he might really succeed in cleaning up the frightful mess of corruption and crime which was fostered by his Tammany predecessors.

He has the people of New York behind him to a degree of unanimity which I have never seen in the New York political picture before.

Fiorella is a lone wolf in politics. Therein lies much of his strength. He owes nothing to any party. Nobody has any strings on him. Nominally a Republican, he was once elected to Congress as a Socialist when the Republicans refused him a renomination. He loves to stir up trouble among politicians. That is one reason why ordinary citizens like him.

Keep an eye on Major La Guardia. He will go far.

EDUCATION . . . and leaders
The young new President of Harvard, Dr. J. B. Conant, said the other day that the whole college system needs reorganization, both in the way of making it harder for those unfitted for higher education to get in and easier for youth of real talent to obtain the best education available.

We are going to look more and more to the universities for leadership, I imagine, especially if the "New Deal" proves a success. The program on which this effort is now being made to rehabilitate the nation is largely the product of university men of comparatively recent crops. I think the time is past when the principal qualification for public leadership will be a loud voice and a pair of ready fists.

I have no illusion, however, that the mass of the people will ever vote for a man merely because he is more intelligent than they are.

BUFFALO VIEW
Sunday School was held at the Gould home on Sunday last.

We report this week that Mr. and Mrs. Bowley have taken up farming near Edgerton. They left for their new home on Saturday, February 24.

Mr. and Mrs. Bill Stewart have also moved to a new home further east.

Mrs. Leith is in Edmonton.

Master Jim Carrier was in Edmonton for three days having obtained a free pass as winner in the Boys' Club. Everyone wishes him a good time.

Mr. Cooper, Sarah, Bill and Mr. Fred Walter spent Sunday evening at the home of Mr. and Mrs. Tom Motley.

Mrs. L. Teeters is spending a few days in Wainwright.

Mr. and Mrs. Almost spent Monday evening with Mr. and Mrs. Gould.

SYDENHAM

Another enjoyable whist drive and dance was held in the school, Friday evening, March 2nd. A fair crowd attended. First prizes at cards were won by Miss Marjorie Brink, and Mrs. A. Caste. Second prizes went to Mrs. P. Church and Mr. R. Sodergren. Music for the dancing was supplied by Mrs. MacDonald and Mr. Garneau.

Mr. and Mrs. Jack Baker located at their own home, a little east of the school during the week.

We are sorry to report the illness of Master Wilfred Croteau. We all wish him a speedy recovery.

Mrs. Fred Church and Mrs. A. Woodward were guests of Mrs. C. Alexander Thursday afternoon.

Mrs. Bannell spent several days this week a guest of Mr. and Mrs. Omer Croteau.

Mrs. Frank Seabrook entertained Mrs. Glenn, Mrs. Stadschub, Mrs. Croteau, Mrs. Bannell, Miss Ida and Miss Pauline Romeo last Tuesday afternoon.

Motorists are experiencing difficulty in travelling over the roads of the district.

The re-seeding of abandoned lands has been the subject of a number of trials at the Dominion range station at Manyberries, Alberta. In these lands created wheat grass has been grown with the best results.

ASPEN

Mr. and Mrs. J. E. Challenger entertained a number of their friends on Tuesday evening, March 27. The evening was spent in cards and dancing. Among those present were Mr. and Mrs. Elwood, Mr. and Mrs. Wainwright, Mr. and Mrs. Smith, Mr. and Mrs. Busby, Mr. and Mrs. Lee, John, Mr. and Mrs. J. A. Lytle, Mrs. Carr, Mrs. F. Kinnibill, Mrs. I. Kinnibill, Mr. and Mrs. V. Wheeler, Mrs. Adams, Misses May Otterholm, May Roberts, Phyllis Watson, Evelyn Watson, Margaret Kinnibill, Doris Kinnibill, Merna, Geo. Otterholm, G. Hallett, W. Kinnibill, G. Kinnibill, C. Jeffcoat, J. Lytle, Y. Olson, R. Challenger, Bobbie Watson and Frank John.

Mrs. R. Johns has returned after spending a short time with Mrs. N. Western of Trafalgar.

Miss Elsie Haywood of Wainwright is spending a few days with Mr. and Mrs. R. Elwood.

Mr. J. Olson has moved into the Bray house.

Quite a number from this district visited the ski-jumping contest at the Battle River on Sunday. All report a good time.

Old man 'Hu has visited the district. Among the sufferers from his calls are Mr. and Mrs. G. Bishop, Mr. J. E. Challenger and Mrs. Adams.

Mr. N. McTurk is making preparations for moving his family and effects to his new farm in the Sligo district.

FABYAN

Miss Winnie Taylor, junior room teacher of grade, who is recovering from a recent operation in Edmonton is expected home this week end.

The Ladies' Aid of Roseberry and Alma Mater districts put on a very successful and enjoyable concert in Roseberry school, Friday, Feb. 23. The Orchestra, Young People put on a play entitled, "Captain Rackett." The amusing comedy caused much merriment. The director, Miss J. MacLean, also arranged a dance to follow, music provided by Coultman's orchestra.

A dance was held in Plaxtoll school February 25. Williams's orchestra provided the music.

The dance at Fabyan, arranged for the 16th of February, was postponed due to the condition of the roads. The river has been almost impassable for the past few weeks.

Mrs. William Simpson was taken to the Wainwright hospital. We wish her a speedy recovery.

The regular monthly meeting of the Avondale, U.F.W.A. was held at the home of Mrs. J. Thomson, Thursday, February 15th. The Misses Martha Johnson, Lily Simpson, Ellen Fiedler and Agnes Barrett assisted in serving lunch.

Miss Kathleen Kinghorn is visiting Miss Dorothy Hetherington, of Autumn Leaf district.

The weekly card party of the Autumn Leaf community was held Tuesday, February 20, at the home of Mrs. Caron.

SLIGO

Mrs. W. J. Reynolds has returned home from Edmonton after a lengthy visit with her daughter Ellen.

Several of the school children are home from school with colds and sore throats.

On Wednesday last, the Sunnyvale U.F.W.A. put on a whist drive in Saddle Hill school. An enjoyable evening was spent at the end of which the prizes were distributed. The prize winners were: 1st, Mrs. George Sawyer and Mr. Jack Guthrie; 2nd, Miss Kay Reynolds and Mr. Lloyd Hillier; consolation, Mrs. Vernon Guthrie and Mr. O. McFarland.

Tuesday evening a number of the ladies of the community gathered at the home of Mrs. E. Burnett for the purpose of wishing Miss Evelyn Redmond every happiness in her married life. Games and contests were played at the close of which the guest of honor was presented with many useful and pretty gifts. A dainty lunch was served during the evening and everyone joins in wishing Evelyn lots of happiness and good luck.

Quite a number from this community attended the ski-jump last Sunday and report a good time.

A yield of 65 bushels per acre was obtained with Alaska oats at the Dominion Experimental Station at La Ferme P. O.

HOPE VALLEY

Mrs. A. J. Taylor entertained at bridge on Friday, February 23. The high scores for the evening were Mrs. J. Frue and Mr. Everett Taylor.

Mr. and Mrs. N. H. Armstrong visited the latter's parents at Cumming during the week end.

Jack Frost reminded us last week that he still packs a stiff left.

Don't forget the St. Patrick's concert and dance in the Gilles school on Friday, March 16.

TRAFALGAR

Miss Edith Wilson is visiting friends and relatives in Edmonton.

Mr. and Mrs. Baxter who have been visiting at Victoria are now spending a few days with Mr. and Mrs. G. S. Baker before returning to their home in Manitoba.

We are pleased to see Mrs. E. McLean again.

School was closed at Trafalgar one day this week on account of the illness of the teacher, Mrs. E. McLean.

Europe as a whole, excluding Russia, wheat acreage is now above the pre-war level. The major importing countries however, have not reached the pre-war level but this is offset by increases in the rest of Europe.

Here every week

AMONGST THE BATAKS OF SUMATRA, BOYS WERE ASKED HOW THEIR TEETH WERE SET. THE ANSWER WAS: "THEY WERE SET BY THE GODS, WHOSE TEETH ARE SETTING DOWN UNTIL LEVEL WITH THE GUMS."

Experimental Farms News

CHOICE OF SUITABLE VARIETIES OF GRAIN

By "suitable varieties" we mean those sorts which are best adapted to the special conditions of soil and climate under which they are to be grown. Every farm has its own peculiar conditions and every farmer should understand the nature of his soil and have an idea of the climatic conditions he is likely to encounter; that is, he should know the probability of late spring or early fall frosts, and the average amount and time of rainfall.

Yield per acre is too often the only feature considered in selecting a variety of grain. A heavy yield of good quality grain is the ultimate aim but profit depends on many factors. Some of the characters which determine the suitability of a variety for a farm or a district are: the number of days required to reach maturity, length and strength of straw; length of head; freedom from shattering; resistance to disease; quality of grain; weight per measured bushel; as well as yield per acre. By selections from old standard varieties and by crossings, varieties of cereals have been developed which differ very widely in all of these characters and which are adapted to a wide range of soil and climatic conditions.

At the Dominion Experimental Station, Lacombe, a very large number of variety tests are carried on annually and through good years and bad there are a number of varieties which always head the lists as being admirably adapted to conditions of soil and climate in Central and Northern Alberta. These include: Reckard and Garnet wheat, Legacy oats and Teckel barley. These varieties may often be successfully ripened in districts where the season is too short to mature the standard sorts such as Marquis wheat, Banner or Victory oats, and O.A.C. 21 or Manitoba barley. These early grains, in addition to being a safer bet in the race against frost, give good yields of high grade seed and, in the case of Legacy oats, fine quality flour.

FEEDING THE ORPHAN LITTER

Almost every pig breeder has now to bring some pigs up on the bottle. The usual experience is that the pigs do not take to the bottle and the milk does not agree with them, because of the difference in composition of sows' milk. A carefully worked out, modified milk formula that has been successfully used at the Dominion Experimental Station, Lacombe, is made up of:

- 1 lb. cows' milk
- 1 lb. lime water
- 1 lb. separator cream
- 1 lb. sugar

These should be mixed in a clean vessel and the pigs from 1 to 10 days old should be given about one-half pound each divided into five feedings over a 24 hour period. The young pigs should not gain in weight for the first ten days, and if they can keep in a healthy condition for that time there will be far less danger of losing them later. When the pigs are over ten days old, the amounts of sugar, cream and lime water should be gradually reduced until at the age of three weeks straight cows' milk may be safely fed.

Before the pigs have learned to drink, the thumb of an old kid glove pierced at the tip, and securely fastened on to the neck of an ordinary bottle, will greatly simplify feeding. Special care should be taken to thoroughly sterilize every vessel in feeding the pigs.

CARE AND MANAGEMENT OF BROOD SOWS

Exercise, a well-balanced ration, minerals, and dry, well ventilated, inexpensive sleeping quarters are essential to the health of the sow and prospective young. Attention to these points is necessary in successful and profitable hog raising.

Experimental tests have proven that sows that are closely confined during the pregnant period often give birth to soft, flabby, weak pigs, lacking in vigour, with heavy mortality.

milin' Charlie Day

Th' wimmin folks sure do look good in their frills of to-day, but how d'ye suppose they're gonna look in th' old family album, ten years from now?

As a result, Varieties in the ration ensure health, supplies the necessary food nutrients for all the vital organs, and materially reduces the quantity of feed required per day.

In certain districts, the home-grown grains do not contain enough calcium and phosphorus, and for that reason it is strongly advisable to keep a recommended suitable mineral mixture before the brood sows. At the Dominion Experimental Station, Rosthern, the amount of mineral consumed by all classes of hogs has been rather surprising, even the three-week-old pig taking readily to it, which seems to indicate that certain minerals which are not present in the sows' milk are required for body metabolism.

At the Rosthern Experimental Station the Asphaded colony houses, banked with straw, or straw shelters have proven to be the most satisfactory quarters for brood sows during the winter months. The bedding should be inspected occasionally to see that it is dry and that there is enough of it. The sows should not be overcrowded even in colony houses or straw shelters, as the old sow has been known to develop pneumonia or rheumatism, possibly from becoming overheated and then chilled.

A winter ration for brood sows which has been used with very satisfactory results at the Rosthern Experimental Station from the standpoint of health and condition of the sows and number, thrift and low percentage of mortality in the litter can be made up of the following: home-grown grains: oat chop, 200 lbs.; barley chop, 100 lbs.; ground wheat or screenings, 100 lbs.

COLD WEATHER NOTES

Look out for frozen drinking water. About two-thirds of every egg consists of water, so hens must drink plenty of water, so hens must drink plenty of water in order to keep up egg production. If there are no facilities for keeping the water warm in the poultry houses, hot water should be supplied as often as necessary during the day in order to prevent freezing.

It is especially desirable to have water with the chill removed available first thing in the morning, as most hens like to drink as soon as they are aroused. Don't force hens awakened by electric lights to wait until later for a supply of drinking water.

Green foods, such as lettuce, kale, onions, and spinach, should be fed all winter long, if possible. Green clover or alfalfa hay is good, if fresh greens fail, so also are cabbage and carrot tops. But do not feed raw potatoes or frozen feeds.

Provide sufficient ventilation at all times to prevent moisture from gathering on the litter and walls, but avoid drafts in cold weather. Provide cloth curtains for certain openings into the house so that the birds can be protected during heavy storms or zero weather without cutting off the supply of pure air.

The litter on the floor should be kept dry and clean.

In cold climates the back and side walls of the poultry house should be covered on the outside with two-ply roofing paper.

It has been shown that increased egg production can be secured by keeping the temperature inside the laying house at Canadian National standards by artificial heating systems. Artificial heat, however, involves considerable expense and, apparently, the financial advantage is not sufficiently great to warrant its general adoption. It is more important to avoid sudden temperature changes, drafts, dampness, and bad ventilation.

Do not allow eggs to freeze. A frozen egg is a low quality egg because its white breaks down and the shell may be cracked. In cold weather, collect eggs both noon and night.

APPLES FOR OLD COUNTRY

MONCTON, N. B.—The test shipment of British Columbia apples for export to the Old Country via Canada's Atlantic ports arrived here February 19 on Canadian National rails, after having travelled across the Continent. Six cars were immediately dispatched to Halifax and five cars to Saint John.

Some of the cars had special thermometers attached both inside and outside, and readings which were taken periodically showed that satisfactory temperatures were maintained inside the cars.

Much depends on this initial commitment as, if it proves successful it will in all probability develop into a regular export traffic during the winter seasons.

PROVERBS, POEMS & PROPHECIES

Ten fairly representative people were asked, "What do you know about Solomon?" Four of the ten answered, "nothing." Other answers were: He had two thousand wives; he was the husband of the Queen of Sheba; he built Solomon's Temple; he was the wisest man that ever lived.

The statistics regarding Solomon's marriages as given in the Book of Kings are "seven hundred wives, princesses, and three hundred concubines." The Queen of Sheba was not officially among this distinguished monarch in her own right, she was so impressed by the stories of Solomon's splendor and wisdom that she made a long journey to visit him and after a series of receptions and banquets returned to her home. The present kings of Abyssinia claim their descent from Solomon and this queen, if they are justified in their proud boast her visit was not wholly Platonic. It may have been true of her, as she said of Solomon that "the half has not been told." All that we know certainly is that she never appears in the Bible again.

Solomon did build the temple and it remained the pride and glory of Jerusalem until the destruction of the city by the Babylonians in 586 B.C. But the most enduring monuments left by this great ruler were not in stone or bronze, but in words. The Proverbs, a rich mine of wisdom wherein every nugget is solid gold. One can only marvel at reading them how a man so wise in other ways could have been so unwise a bout women.

He made a fine start as king. The Lord appeared one night in a dream, asking him to name his heart's desire, and Solomon answered:

"Thou hast made thy servant instead of David my father; and I am but a little child; I know not how to go or come in . . . Give therefore thy servant an understanding heart to judge thy people, that I may discern between good and bad; for who is able to judge this thy so great a people?"

Because this was in thine heart and thou hast not asked riches, wealth, or honour, such as none of the kings have had that have been before thee, neither shall any after thee have the like.

Without this wise choice on the part of Solomon we probably never should have had the Proverbs; but something more than inspired knowledge went into them. They bear evidence of comprehensive experience with every phase of human nature and conduct. Some of them, as might be imagined from Solomon's own record, contain warnings against the unrighteous woman.

From figures available, says the Superintendent of the Dominion Experimental Farm at Agassiz, B.C., it is learned that well over two million tons of grain are marketed annually in Canada through the dairy cow. In one year alone the revenue from dairy products approached close to the three hundred million dollar mark. Thus, in her sphere of activity, the dairy cow not only manufactures the most important food-stuff known, but also serves as an appreciable agent in the marketing of the world's grain supply.

Shipments of wheat through the port of Churchill, Manitoba, during the crop year totalled 2,736,030 bushels, of which 1,892,025 bushels went to the United Kingdom, 280,013 bushels to France, and 311,000 bushels to Italy.

able to judge this thy so great a people?

To which the Lord replied: Because this was in thine heart and thou hast not asked riches, wealth, or honour, such as none of the kings have had that have been before thee, neither shall any after thee have the like.

Without this wise choice on the part of Solomon we probably never should have had the Proverbs; but something more than inspired knowledge went into them. They bear evidence of comprehensive experience with every phase of human nature and conduct. Some of them, as might be imagined from Solomon's own record, contain warnings against the unrighteous woman.

FIFTY YEARS' FARM LABOUR

In 1881 there was 1.43 persons gainfully employed per farm in Canada. In 1931 the number was 1.55 per farm. In 1881 there were 33,071 acres of improved land per worker while in 1931 there were 76.01. In other words, the improved acreage per farm more than doubled during this period of fifty years although there was practically no change in the number of persons engaged on these farms—Dominion Economics Branch.

WORTH OF THE DAIRY COW

From figures available, says the Superintendent of the Dominion Experimental Farm at Agassiz, B.C., it is learned that well over two million tons of grain are marketed annually in Canada through the dairy cow. In one year alone the revenue from dairy products approached close to the three hundred million dollar mark. Thus, in her sphere of activity, the dairy cow not only manufactures the most important food-stuff known, but also serves as an appreciable agent in the marketing of the world's grain supply.

Shipments of wheat through the port of Churchill, Manitoba, during the crop year totalled 2,736,030 bushels, of which 1,892,025 bushels went to the United Kingdom, 280,013 bushels to France, and 311,000 bushels to Italy.

Origin of Words and Phrases

"MARRIAGES ARE MADE IN HEAVEN"

In giving the origin of that romantic old saying that "marriages are made in heaven" the sad task of disillusionment must be accepted, and we find in the phrase nothing romantic, but rather a satirical and sardonic flavor.

In that immortal work, "The Anatomy of Melancholy," by Robert Burton, who helped so much to give literary significance to the early part of the seventeenth century, we find this:

"Marriage and hanging go by destiny; matches are made in heaven."

TO GO TO THE DEVIL

On the spot where Chalmers bank now stands, near Temple Bar, London, there was a long noted tavern called "The Devil." This was the meeting place of the Apollo club, so famous English letters, and the eating place of the lawyers of the neighborhood. So well-known was the place in the London of those days that when the lawyers, going to dinner, hung on their door, a notice saying "Gone to the Devil," anyone knew where to find them. And many well-read people have attributed to his own modern saying, "gone to the devil" meaning "gone to ruin."

Also the origin of the phrase has been credited to Samuel Johnson, who is quoted in the fourth volume of Boswell's famous "Life of Johnson" as follows:

"Let him go abroad to a distant country; let him go to some place where he is not known. Don't let him go to the devil, where he is known."

However, Samuel Johnson lived from 1709 to 1784, and we find a recorded use of the expression "to go

to the devil" under date of 1485 in number 512 of the famous *Paston Letters*, which were published in London beginning in 1787.

"DUMB OX"

"Dumb Ox" is no chance vulgarism, no invention of a modern school boy in passing allusion to the dumbness of the ox. For this was a historic source. The words have the nickname given the great Thirteenth Century scholar and theologian, St. Thomas Aquinas, when a student at Cologne. He was very stout and had a large head, partly bald, and received also the impressive nickname, "The Great Dumb Ox of Colby."

In later years St. Thomas Aquinas was called the "Angel of the Schools" and the following lines from Longfellow's "The Golden Legend," also the original "Dumb Ox" are significant:

"Of a truth, it almost makes me laugh

To see men leaving the golden grain

To gather in piles the pitiful chaff

That old Peter Lombard threshed with his brain.

To have it caught up and tossed again

On the horns of the dumb Ox of Cologne."

According to Canadian Customs returns during the month of December last, 17,457,963 bushels of wheat valued at \$11,300,336 were exported from Canada.

Lamb meat of medium or inferior quality is characterized by being somewhat dry in the flesh, or, if from immature unfinished animals, is inclined to be soft. Over-finished lamb also is less desirable and may be slightly wasteful.

SLAT'S DIARY

Friday—Aunt Emmy tuk the bus and went to the city today and tonight she came home very tired becuz she had skoured the stores in the city trying to find sum Laurels. She said she had been reading a lots here of lately about so menny people using there Laurels to rest on.

Saturday—They was a famous site of hand man here at the Or house today and tonight and Jake and me went down to the hotel to see him and we went up to his Room and they was a woman cum to the dore and we sed we wanted to see the site of hand man and she sed he was sick. In becuz we was his sons, and she replied and sed: Well I declare I diddnt no that you see I am his wife. We dident see him.

Sunday—The boss down at the noose paper where pa works called up pa today and sed Mr. Flick was very angry becuz there was a paper where he sed. Well I declare I diddnt no that you see I am his wife. We dident see him.

Monday—I seen Blisters today and he sed he had got a kicking on Saturday nite after him and his pa had and argment about whether that was the Saturday for Blisters bare or not. Blisters sed he was sure he tuk a bath the Saturday nite before.

Tuesday—Pa has lost his job over at the Cort house. Pa sed he had nothing todo but the boss that he wasent doing a very good job so they fired him.

Wednesday—I guess pa is about sick of the noose paper business. Yesterday he printed the news about Mabel Fudge getting married to Harve Purry and he went and got the wrong hed line over it with red. Local man gets tough sentence. Mabel Mabel is sore—so is Harve.

Thursday—I went and ast pa today what they call a man with never give in as long as he knows he is rite and pa sed they cal him a Batcheler. Ma was in the cellar at the time.

PRODUCING POULTRY MEAT

Experiments at the Central Experimental Farm, Ottawa, have shown that it takes 281 pounds of mixed grain to grow Barred Rock cockerels to twenty-six weeks of age, weighing an average of 6.68 pounds. That is, with a good class of Barred Rock chicks, 41 pounds of grain can be converted into one pound of meat. The lighter breeds consume an average of six pounds of feed for each pound of gain in meat.

HARVESTING COST

The use of the combine-harvester has reduced the cost of harvesting by the elimination of labour largely, from 61.1 cents per bushel to 7.2 cents, according to experiments conducted at the Dominion Experimental Station at Swift Current, Sask.

Spraying wild mustard with a 11 per cent solution of copper sulphate gave excellent results last season in the field husbandry work of the Dominion Station at L'Assomption, Que. Q.

SOMETHING WORTH-WHILE FOR WAINWRIGHT

Possibly nothing will advance the interests of education in our town and district more quickly nor more thoroughly than a good public library, with its facilities for obtaining knowledge as well as pleasure for both old and young. And for that reason, if for no other, Mayor Forster is certainly to be highly congratulated upon bringing before the Town Council the matter of obtaining such an adjunct to advancement right here in Wainwright.

From what we learn, our Mayor is in communication with the authorities of the Carnegie Trust Foundation, and we understand that it is that august body which makes decisions as to the desirability of placing library facilities in centers which are chosen.

We have here in Wainwright a splendid building (The Town Hall) which could surely be used for the purposes under consideration, and so far as information can be obtained, other places in the province having libraries under the same scheme have arrangements whereby the work of caring for the readers' demands in exchange of books, etc., is taken care of by volunteer help.

The scheme is one which our Town Council will no doubt do all possible to assist in, and Mayor Forster may well feel that bringing this to a happy conclusion he will have done something worthwhile for Wainwright and district.

"HOME TOWN LOYALTY"
"For many years the local merchants have been campaigning against mail order from any person except the local storekeeper. They have asked the local newspaper to help them spread this gospel. The papers did, and in addition many refused to carry advertisements of any kind for mail order houses. They thought this was good business all around, as it would build up local sales and help the newspaper in the end."

The Star has also been asked by the merchants and business men times without number to take up the cudgels for the local merchant and discourage out-of-town buying. With very short memories, the merchants today are doing, in some measure, the very thing they have asked the newspapers to fight in the past years. Here are some instances:

Some outside printing concerns send out solicitors or advertise through the mail cheap prices on letterheads, envelopes, statements, etc. The prices are less than the local printer's—a dollar or so less a thousand. Many send their business reports to town yet expect the local printer to buy their goods. Chain stores ship their sale bills all over the country at a low cost to the branches, yet expect the local printer to buy from them.

Banks buy stationery out of town, yet expect the local printer to carry an account or be able to pay his note. The only excuse is the saving of a few dollars on each order of printing, while sending money out of town which can never return. This applies especially to the smaller localities, but in the larger cities there is about the same condition. Plants doing printing outside the district, and frequently a thousand or more miles away, are given work, yet the buyer of printing depends upon the local population for business. This is just as true in one sized town as another.

The one great point that most merchants fail to grasp is that every dollar they send out of the community is gone. On the other hand, every dollar spent in the community returns, directly or indirectly. Directly, it will mean the sale of merchandise to the printer or his employees. If money is not spent with them they will not have any money to spend. Indirectly, the printer and his employees pay taxes, support local enterprises, contribute to the upbuilding of the community.

Again if pauper prices are paid for printing (or anything else) only paupers can buy the merchandise. It is a lessening of buying power, bound to react against a community in the ultimate. Property, or good business, cannot be established in a pauper community. If there were fewer buyers at pauper prices there

would be fewer concerns offering goods at a pauper price. Merchants who want local trade must patronize local industries on the basis of fair prices. It is the only way toward a good business condition and a cure for price insanity.

It very often happens that the merchandise bought away from home is not so good as you can get at home, and in the case of printing it usually has to be bought in very large quantities to get the price. The business man expects the local printer to give as good a price on a 100 of 500 order as the outside concern quotes on a 1000 or 5000 order, then wait until the end of the year or longer for his money. With the outside concern it is cash, or at the best thirty days.

To tell the truth newspaper publishers in the smaller towns especially, are becoming fed up with this "home town loyalty" cry, in which they have been left holding the bag on so many occasions and which has made mighty few returns so far as they are concerned.

FLOGGING THE OLD DEAD HORSE

As Edson R. Waite says:—Our politicians seem to be quite busy right now along the other fellow. We read a lot of ancient history. Not that ancient history is not interesting, but too many on the payroll are taking up too much time talking ancient history. But I imagine the average taxpayer is supposed to foot the bills and listen and admire.

There seems to be a lot of controversy about this and that. Political controversies will probably rage until the end of time, for once politics get a bone of that nature between their teeth, they are loath to let go.

A lot of our lawmakers continue to flog the same old dead horse, apparently in utter ignorance of the fact that a whole team of new horses have galloped away with the situation that they imagine they are discussing.

There also seems to be a lot of hysterical outpouring from the "yes man". Well, the folks at home are ready to talk to them when they get home.

WHY NEWSPAPERS MAKE MISTAKES

The editor of a local newspaper is often unjustly censured for his mistakes. The wonder is that he does not make more of them. On the average paper, he must deal with all kinds of subjects, give names, dates, etc. One hour he is engaged in reporting a meeting of some kind, and the next drawing the picture of a hockey game. He must condense and fill with his items several columns, whether events are transpiring to produce material for his use or not.

Count the local items in a paper and imagine how many steps they have required, how much mental anxiety, worry and the work they have cost and some idea of the editor's work can be gathered. The smallest may have cost him a long walk and much effort to reach the facts.

There is no end of his work. When one paper goes to press he turns his attention to the next one. He makes the rounds in search of news and may get a line. From some he must get news without their knowing, drawing them into conversation and obtaining what he wants in sections. He may labor for hours in chasing down a rumor to find that there is nothing to it.

His local columns stare him in the face and demand to be filled with the cream of news events and matters of interest. His bounds are limited and yet he must find each day and all through the week, month and year, something of interest to the public. No more perfect treadmill could be devised.

With such constant strain, producing weariness of the body and mind and an almost endless variety of subjects to be touched upon, is it surprising that he should make a mistake? Other people do, why shouldn't an editor?

Of course, we are referring all through to a real, home-town weekly newspaper.

In The Mail Bag

THE HOCKEY TEAM

Editor, The Star:
It has been quite clearly pointed out that the Wainwright Hockey team have disbanded for the present season, allegedly due to the attitude taken by the public in non-support.

This puts all the blame on the public and none whatever on the hockey organization, which in my opinion, should be turned about; the team and management accepting at least part of the blame.

There are three main points to getting out a crowd to watch a hockey game and these are: (1) Give them something to see when they get there by putting a well-dressed team on the ice; (2) Start the game on time—not let the fans stand on the side lines and watch a few players practice for half-an-hour or so; (3) When there is a game scheduled let the town folks at least know about it.

During the past season these points seem to have been sadly mis-managed. In the first place the hockey "dish" up to the fans was NOT up to the standard which it could and should have been—due no doubt to the fact that when a practice was called for, ten or twelve a few would be on time, some half-an-hour late, others an hour late, and indeed some not bothering to come out at all until wanted for the next game. It is impossible for any coach to drill the team in a combination play with the players struggling in at all times, and yet they blame the public for not turning out to watch them!

Now as regards starting on time. We know that there are occasions when a team driving the winter roads is held up, which therefore causes a game to be delayed, but you will find in nine cases out of ten that it is a few players on the team that are absolutely nothing to do but get to the rink—who hold up the starting of the game. The fans pay their money to see a hockey game not a few players on the ice warming up.

To expect a person to come out to a game, you must first let him know there is one being played. This very important end of the procedure was very sadly neglected. One or two notices have been put up, but that has been about the end of the advertising. If others saw the bill, O.K.; if not they were criticised for not turning out just the same. There are more good ways than one of letting everyone know that an event is being held. For a very moderate sum a few hundred handbills can be obtained and one put into every home a few hours before any game is scheduled to be played, although a rangemaster if properly made should tend to give more time for announcement than seems to be the case here. Another way which we know will prove successful, and more than pay for itself, is to carry an advertisement in the local newspaper. These are not experiments, but known facts which have been proven in other towns.

The people of Wainwright are of the same temperament as those of anywhere else. If you "dish up" a good live brand of hockey and let the folks know about it, they'll be out at the rink to see you "strut your stuff!"

Another One of the Team

Dear Editor:

What's wrong with Canada? She's in a depression. What caused the depression? "Capital" doing the wrong thing. What to do to remedy the depression and so put Canada back on her feet?

Create employment.

How?

Force manufacturing into Canada.

How to do that?

There are different ways:—

(1) By making "the playing of the Stock Market" absolutely illegal—"Sweepstakes" are illegal because they are "gambling." The stock market playing as we have it today is the worst kind of gambling we have, or could have. As soon as "Capital" is "Capital" in this country, it starts playing the stock market. If it wins, it keeps on playing "Capital" and the people who have lost are looking for work.

(2) By raising tariffs so high that outside manufacturers can't sell in Canada, but will have to manufacture in Canada and so create enough employment to immediately end the present depression.

Then, do we need a new government? No! Remember how much grief is connected with every administration, and bear in mind the fact that the Hon. Conductor who built a very fine house costing so much more than his salary was allowing him to spend, that the directors of the Company started an investigation to look into the graft, when it was found that he must have been "splitting tickets." The president of the company went to see him, and told him that it was necessary to fire him and to put a new man in his place.

"But," said the conductor, "Remember that I have a house built and the new man, whoever he is will have to build one too." So what?

PUBLICUS

Our Parliamentary Ottawa News Service

(Continued from page one)

held in part at least with the central institution." The proposed capital is \$50,000,000 the shares of \$100 per value, limited to fifty shares held by or for the benefit of any one person. Shares can be held only by British subjects ordinarily resident in Canada, or by Canadian corporations. Chartered banks, bank directors, officers and employees are strictly prohibited from holding shares in the central bank. Dividends to shareholders may not exceed six per cent, and profits in excess of this must be paid into the consolidated revenue fund. There will be no double liability for shareholders.

Provision is made for the appointment of a governor, a deputy governor and an assistant deputy, these to be appointed in the first instance by the governor in council for terms of seven years, subsequent appointments to be made by the directors. Seven directors will also be appointed by the government, with retirement at the end of the third, fourth, fifth and sixth years, and re-appointments made by the shareholders for five year terms. Proxy voting will be vested strictly in the Minister of Finance. The head office of the bank will be in Ottawa, with branches and agents elsewhere as the management finds expedient, and provision is made for weekly, monthly and yearly statements to the government. Bank of Canada notes will be legal tender, but not redeemable in gold except in the form of gold bars of 400 fine ounces, in uniformity with regulations in Great Britain and the United States. The gold reserves of the chartered banks will be taken over by the central bank at the rate of \$20.60 per ounce, the standard rate under the Currency Act, any profits arising out of the increased value of gold accruing to the dominion government.

When the Minister of Finance resumed his seat, Hon. Mackenzie King reminded the House that the Liberal program as outlined by himself just one year ago included the principle

of a central bank, and he congratulated the government on having acted upon a suggestion from the opposition.

The Liberal leader emphasized the point that while agreeing on the establishment of a central bank his party reserved the right to suggest amendments on the details of the bill.

Mr. Coote (U.P.A.) also pointed out to the House that the establishment of a central bank had been urged from that corner of the chamber for a number of years, he himself having put such a resolution on the pages of Hansard in 1931. The suggestion had received no support from the Liberal leader at that time and the Prime Minister had asked him not to press his motion as the country was not prepared to make the change. The Member for Macleod was of the opinion that if the bank had been established three years ago this country would be better off by a billion dollars today. He also thought that turning over the Central bank the sole right to issue legal tender and credit in Canada would give a private corporation more power than the government itself had. Mr. Woodworth supported these contentions and said, "The pressure of public opinion undoubtedly has forced the government to take action along this line but I am afraid the central bank may become a means of more effectively scalping the public. The power of finance in Canada is almost supreme today. I think I am not going to far when I say that in practice it is greater than that of the government. In this legislation we are doing nothing to take the control from the hands of the financial interests and put it under the power of this parliament."

The Prime Minister replied some length to these claims and criticisms enlarging on the Finance Minister's remarks. "I do not know that any purpose is served by wandering around to ascertain who was the putative father of this particular idea in days gone by," said Mr. Bennett. "It is sufficient to say that this government is assuming paternity for the measure at the present time. I am glad to feel that, apart from question of paternity, we are a unit in desiring that this measure shall

be as perfect as our united wisdom can make it."

There is little doubt that the provisions of this bill will be controversial as the Railway Bill last session, and the debate in committee will be as a serial story of some length.

Several other bills, private and government, have come up for discussion, two of the former meeting a summary fate at the hands of the government.

HORSES ON THE FARM

A striking comparison is afforded by the numbers of improved acres per horse on farms in the Prairie Provinces for the two most recent census years (1921 and 1931). In 1921 the acreage of improved land in occupied farms was 44,868,266 and the number of horses 2,239,873 or 20 acres per horse. In 1931 the corresponding numbers were 59,864,632 acres and 2,992,684, or 20 acres per horse.

The Way to the Cross.

March 11—(d) They with a Materialistic Outlook.

March 18—The purpose of God in the Crucifixion of Jesus.

March 25—Redeeming Love Triumphant.

April 1—Easter Sunday.

We invite you to worship. Come and follow in thought what Jesus did to bring life to men.

"Star's" Garden Service

(Special to "The Star")

NOT TOO SOON FOR PLANS

The old joke about the seed catalogues arriving in mid-winter must have originated with a person born and reared in an apartment house.

As a matter of fact the seed catalogues are not usually mailed before the middle of February and at that time they are not a bit too soon to be of practical value, because the successful summer and fall garden usually start from plans drawn up when snow still covers the ground. And now, with the days growing longer and the normal person becoming more restless to get out of doors, this is the time to plan. Not only will a piece of paper, a pencil, and a catalogue, provide one with several evenings of entertainment but it will pay dividends in more and fresher vegetables and continuous and more varied bloom.

STRAIGHT ROWS

Vegetables like soldiers must grow in straight rows, and the reason is the same in both cases. Not only do the troops and the radishes look neater when exactly in line, but by this method a greater quantity is put into the same space.

In the small lots in town, the latter point is an important consideration while on the farm, neatness will be the chief appeal.

SPRING

Will Soon

Be Here

With Seeding Time coming you are possibly thinking of a new GRAIN DRILL, DISC HARROW, DRAG HARROW, OR SOME OTHER NEEDED TOOL FOR YOUR SPRING WORK. If so, we have some wonderful buys in any of these and others of the "OLIVER" line.

Each year our "OLIVER" Customers are increasing. Get the Habit and start to "OLIVERIZE" your farm now. "OLIVER" Tools are popular with the Best Farmers because of the Latest Improvements and Sturdy Construction.

Ask for literature covering your needs and we will assist you in every way possible.

The Douglas Social Credit Plan

This series is an explanation of the Douglas Social Credit Plan. Mr. Williams, a social credit advocate, is explaining the plan to his friend, Mr. Jones (J.). The scene is Mr. Williams' home, and the conversation takes place during an evening visit.

W. "Well, here is some more evidence that supports my contention that banks do not lend money. Listen to what Right Honorable Reginald McKenna, Chairman of the Midland Bank, England, says: 'I am afraid that the ordinary citizen will not like to be told that the banks can, and do, create and destroy money. The amount of money in existence varies only with the action of the banks in increasing and decreasing deposits. Every loan, overdraft, or bank purchase creates a deposit, and every repayment of a loan, overdraft, or bank sale destroys a deposit.'

J. M. Keynes says, 'There can be no doubt that all deposits are created by the banks.' Hartley Withers and you can't accuse him of being unorthodox in financial matters, says, 'A credit in the Bank of England' books is regarded by the financial community as cash and this pleasant fiction has given the Bank the power of creating cash by a stroke of the pen and to any extent that it pleases, subject to its own view as to what is prudent and sound business.'

You may not consider Professor Soddy is an authority in this line but at least he is worth quoting. He says, 'It is possible in these days of disbelief in physical miracles really to caricature institutions which would tend to lend money and do not lend it, but create it? And when it is repaid them, de-create it? And who have achieved the physically impossible miracle thereby, not only getting something for nothing, but also getting perennial interest from it.'

Of course Professor Soddy is a physicist of Oxford University, and not a banker.

J. "If this is true, how long has it been generally known?"

W. "It had never been generally known. Students of finance and banking have known it and accepted it as a commonplace fact for years as witness this extract from H. D. McLeod's book 'The Theory and Practice of Banking,' which was written years ago and used as a text book for young bankers. He wrote: 'The essential and distinctive feature of a bank and a banker is to create and issue credit payable on demand, and this credit is intended to be put into circulation and serve all the purposes of money. A bank therefore is not an office for the borrowing and lending of money, but it is a manufactory of credit. In the language of banking, a deposit and an issue are same thing.'

W. "I have been wondering if you would ask that, and that is why I have been digging around these shelves looking for this little book. It was written by Professor MacGibbon of the University of Alberta. The date is 1924. He says: 'As a matter of fact, banks do not lend money to their customers but a substitute, the bank's own credit.' Now I admit that I have not quoted so many authorities in Canada. The reason is that there have been fewer books published in Canada on the subject of banking."

AMONG THE OLD-TIMERS

"REMINERS OF OTHER DAYS"

20 YEARS AGO

A Mr. G. Wallace was found dead on his homestead north of town. The body was found by neighbors at a haystack close to the house. He was a single man. The coroner pronounced death due to heart trouble.

A by-law to bonus the flour mill in town was accepted by the private bills committee of the provincial government when it was placed before them by Mayor Lally and Mr. H. Y. Pawling.

The matter of inaugurating a sewerage system for the town was on the tapis, and the question was given preference over the installation of an electric light plant.

The Rev. C. H. McLellan was bereaved by the death of his father in the east at the age of 80 years.

And here is another paragraph from the same book: 'It is commonly supposed that a banker's profit consists in the difference between the interest he charges for the money he lends. The fact is that a banker's profit consists exclusively in what he can make by creating and issuing credit in excess of the specie he holds in reserve. A bank which issues credit only in exchange for money, never made and can by no possibility make profits. It only begins to make profits when it creates and issues credit in exchange for debts payable at a future time.'

J. "Well, are you sure that this is accepted by orthodox authorities?"

W. "That is just what I have been quoting orthodox authorities and practical bankers. I have purposefully refrained from quoting Major Douglas or any Social Credit writer. But listen—your know the MacMillan Commission. Not the Canadian Commission, but the larger body that sat in London a couple of years ago? Well, it had bank directors and prominent financial experts among its members. Listen to their report. 'It is not unnatural to think of the deposits of a bank as being created by the public, through the deposit of cash representing either savings or amounts which are not for the time being required to meet expenditure. But the bulk of the deposits arise out of the actions of the banks themselves, for by granting loans, allowing money to be drawn on an overdraft, or purchasing securities a bank creates a credit on its books, which is the equivalent of a deposit.'

J. "Well, for Pete's sake! I thought that a bank was a place where people took any spare cash and left it on deposit in a savings account and then the bank used these deposits to lend to producers to finance their operations. The difference between what the bank paid as interest on savings' deposits and what it received from the borrower, I took to be the source of the profit. This is certainly a revelation to me. But that is all about the British system. Are you sure that Canadian banking is like that?"

W. "I have been wondering if you would ask that, and that is why I have been digging around these shelves looking for this little book. It was written by Professor MacGibbon of the University of Alberta. The date is 1924. He says: 'As a matter of fact, banks do not lend money to their customers but a substitute, the bank's own credit.' Now I admit that I have not quoted so many authorities in Canada. The reason is that there have been fewer books published in Canada on the subject of banking."

A local bonspiel was declared "off" owing to the Town Council ordering the rink closed because the curling club had not paid their \$250 rent. The curlers were indignant.

Natural gas was discovered for the first time in the north area when a well at Athabasca was brought in by the Imperial Co.

Postmaster Cup installed lock boxes for the use of his patrons.

Mrs. L. L. Howes was thrown from a buggy and badly injured with two ribs broken when a team she was driving to town took fright at something on the roadside and upset the vehicle.

10 YEARS AGO

The Maple Leaf Oil Co. of Vancouver, was registered, and arranged to drill for oil and gas in this town on their big holdings at Fabyan. (They were successful and the town is still using the product from these wells—Ed.)

The Town Council had to borrow \$10,000 from the bank for current expenses and schools.

Mr. George Reih gave up farming the Jack McCann place south of town, and had an auction sale.

Mr. Pete Laird purchased the old immigration building on Railway avenue from the Federal government and installed his carpenter shop there.

Mr. Bill Blason suffered an injured back when his team bolted and the wheels of the buggy went over him.

Mr. Minot McLeod purchased the dry and teaming business formerly run by Bill Blason in town.

Mr. David Davidson took a couple of young buffalo from the National park down to their new home in 'Ol' Kentucky.'

The new school at Fabyan was opened with a dance at which a number from town were present.

The C. N. Social club inaugurated a coupon system of purchasing from the local merchants which was well taken up by the members of that organization.

CANADIAN WHEAT WANTED

Speaking of the wheat situation from an importer's point of view, Mr. C. J. S. Bromhall, the international wheat trade expert, told the Regina conference that it might perhaps be emphasized that wheat growers are still in a favoured position, in that they can put on the market the most valued product of civilized man. And in this matter Canadians were particularly fortunate, for they grew a wheat that is desired by millers in all countries. It was true that all millers do not, and indeed cannot, buy Canadian strong wheats, because many countries in Europe, and some outside Europe, had imposed such high duties and milling restrictions that Canadian and other overseas wheat are effectively excluded. But that did not alter the fact that millers want Canadian wheat, especially when they are compelled to mill a very high percentage of soft native wheat.

If properly used, the jardiniere is a source of added beauty to the plants of the home, but ordinarily causes great injury resulting from stagnant water collecting in the bottom of the bowl, causing what is termed "wet feet." This may be overcome by placing a few inches of gravel or an inverted saucer in the bottom for the pot to rest on. Even then the jardiniere should be examined from time to time.

The NEW FORD V-8 FOR 1934

NEW RIDING COMFORT

New riding comfort has been built into the NEW FORD V-8 for 1934. Exclusive Ford transverse double cantilever type springs have great flexibility, giving unusual riding comfort. Road shocks are absorbed by the outer flexible ends of the springs. There are four self shock absorbers. Seat cushions are deeper, springs are softer.

ROOMINESS

The wheelbase of the NEW FORD V-8 is 112 inches. But that doesn't tell the story of Ford roominess. If the Ford 8-cylinder engine were not of the V type, a wheelbase several inches longer would be required to give equal passenger space. You will note the increased space when you sit in the car.

VISIT OUR SHOW ROOMS. GET IN THE NEW CAR—RIDE IN IT. Know for yourself how comfortable it is.

Ease Pain, Headache in Few Minutes

1. PEG, I'M FRANTIC, THIS WORK MUST BE DONE—AND I'VE A SPLITTING HEADACHE.

2. LATER

LOOK WHAT I'VE DONE, PEG—ASPIRIN SURE STOPPED THAT AWFUL HEADACHE IN A JIFFY—NEVER FELT BETTER!

I KNEW IT WOULD! ASPIRIN IS THE QUICKEST SAFE RELIEF FROM PAIN KNOWN.

For Quick Relief Say ASPIRIN—When You Buy

Now comes amazingly quick relief from headaches, rheumatism, neuritis, neuralgia—the fastest safe relief, it is said, yet discovered.

Those results are due to a scientific discovery by which an Aspirin Tablet begins to dissolve, or disintegrate, in the amazing space of two seconds after touching moisture. And hence to start "taking hold" of pain a few minutes after taking.

The illustration of the glass, here, tells the story. An Aspirin Tablet starts to disintegrate almost instantly by you swallow it. And thus it is ready to go to work almost instantly.

When you buy, though, be on guard against substitutes. To be sure you get ASPIRIN's quick relief, be sure the name Bayer in the form of a cross is on every tablet of Aspirin.

WHY ASPIRIN WORKS SO FAST

Drop an Aspirin Tablet in a glass of water. Note that BIPYRICE it touches the water, it has started to disintegrate.

What it does in this glass it does in your stomach. Hence its fast action.

MADE IN CANADA

Does Not Harm the Heart

You can bake all these wholesome breads with ROYAL YEAST CAKES

FULL leavening power, success every time... assured whenever you bake with Royal Yeast Cakes. Individually wrapped in air-tight waxed paper they always reach you in perfect condition. And they stay absolutely fresh for months. No wonder Royal Yeast Cakes have been the standard of quality for over 50 years. Today—they are preferred in 7 out of every 8 Canadian homes where yeast is used.

BUY MADE-IN-CANADA GOODS

"I Keep Prayed Up"

Two parsons -- -- so the story goes -- -- were attending a Conference and had beds in the same room.

They began their devotions simultaneously but the older man was off his knees and into bed in a twinkling.

The younger man's prayer was long. When he rose, he felt called on to chide the older man for the brevity of his prayer.

The old man's reply was both blunt and rebuking:

"I keep prayed up, young man, my system is to keep prayed up!"

THERE'S A POINT IN THIS STORY for those who employ advertising to sell their goods and services. It is, **Keep continual contact**, by the agency of published advertising, with those from whom you want business.

Many sellers lapse into long periods of silence. Then, when business is bad they may burst into advertising, hoping that there will be immediate and earnest attention on the part of those addressed.

Buyers are attentive and responsive to those who maintain steady contact with them—via published advertising. To them they are friendly. When in the market for what the seller offers, to him they turn easily, expectantly, confidently and responsively.

The advertising which costs least—because of a minimum of buyer resistance and a maximum of goodwill and responsiveness—is that which is published continuously. Contrariwise, the advertising which costs most is that which bursts into sight suddenly and intermittently—like the fires of Vesuvius. It costs most because it doesn't get the required response, in the time limit set.

**There's another little story about prayer—
a story with a point!**

A small boy told his Sunday School teacher that he never said his prayers in the morning, but always at night. "And why not in the morning?" asked the teacher. "Why," said the small boy, "any fellow who's any good can look after himself in the day time."

Many sellers are very much like this small boy; many are worse. Many advertise only when darkness begins to fall over their business. Many don't advertise at all.

The right idea is, of course, to keep on distributing among buyers information about one's goods and wants—at all times. Thus do the leaders.

Silence signifies **SELLER-INDIFFERENCE**.

NEWS & VIEWS OF TOWN AND DISTRICT

A whist drive and dance will be held in the Sydenham school on Friday, March 9th. A good time is assured for all.

Little Miss Hamells had a party on Monday celebrating her 5th birthday.

Mr. Rudd is a visitor to the city this week.

As Mr. Mallison who has run the muskrat farm at Fabyan is going to the north country trapping, Mr. Chas. Rennie is taking over its management.

"Don't crack you the joke with me, you big fat monster!" Don't miss the Vimy show; watch for further announcements.

Mr. P. E. Kirkpatrick took a trip to Edmonton on Monday on business connected with his position as supt. here for the Calgary Power Co.

Mr. Earl Lee, who was in the city on business last week returned home on Sunday.

From news advices it is shown that at the Imperial Conference England agreed to take 280 million pounds of hog products from Canada for five years, and all that Canada could ship during 1933 was 80 million pounds; less than one-third of her quota. There surely is big money in hogs at present grain prices, and the market is assured.

The date is now set for the big Dunsmore Recital in the I.O.O.F. hall; this is to be presented on Wednesday, March 21st.

Mr. E. Avison who has been a patient at the hospital for some days is now getting along nicely toward recovery to full health.

It is pleasing to know that Mrs. H. C. Wallace, who has been suffering from an attack of laryngitis is feeling some better now.

*** A large new stock of house-cleaning supplies just received at the Atlas yard. Get yours now. Joe Welch.

A very pleasant afternoon was spent over the tescups when Mrs. J. Pawling entertained on Wednesday last.

The voters of Lloydminster passed the natural gas by-law giving the franchise to a purely local-owned gas company last week by a vote of 241 to 13. This will be the only town in the west supplied with this utility by their own town company—if gas can be found in sufficient quantity.

After a very successful auction sale by Bill Stuart on March 1st, when high prices were realized for a long list of stuff, Mr. Rock Charter left for St. Liboire, Que. The Green-shields district is thus losing another good settler from its midst.

Mr. Wm. Loudfoot was in town for a couple of days from the city last week end.

Emperor Kang Tee was crowned ruler of Manchuria on Thursday last; thus setting up another Chinese monarchy.

Mr. Percy Wilkins who was taken to hospital for an appendix operation on Sunday is now getting along fine.

A list is on display in the Washburn hardware of those from whom a farmer can obtain special seed grain if such is desired, and this should prove of value.

Mr. Wm. Lilly and his bride have now set up housekeeping in the Morley house on Sixth avenue east.

GENERAL MEETING

CANADIAN LEGION, B.E.S.L.

A General Meeting will be held in the Masonic Hall on Saturday, March 10th at 8.30 p.m.

War pictures, Convention Report.

All ex-service men are urged to attend.

Highest Prices Paid—See Mo

For Satisfaction

After having tried the Saturday early closing stunt for some weeks, the merchants of Camrose have decided that the scheme was NOT in the best interest of business, and have reverted to the old closing hours of 10.30, according to a big advertisement in the Camrose Canadian.

Mr. Walter Campbell, of the Wainwright Gas Co. was in town for several days last week, and while here enjoyed several games at the curling rink during the bonspiel.

March came in like a lamb—but how will she finish up?

Mr. E. Turner was in the city for a few days taking his examinations for his final picture operator's license.

Mr. Jack Laird was in Edmonton for a day or so at the week end on Friday when he essayed a trip to Sydenham district. He brought back Mrs. Armstrong who had been staying with her daughter there for a week.

We learn that Mr. Harry Murray has left for Tofield to take charge of the pool elevator for a few weeks during the illness of the regular agent there.

Mr. Wm. Reynolds, who recently fell on the ice and fractured some ribs, is getting along nicely now although the injury is still painful.

Mr. John White the hospital orderly has now moved his family into a house on First street.

Mr. Perrott is here on a visit to Mrs. Perrott's parents, Mr. and Mrs. Reynolds.

*** Get your house-cleaning supplies at the Atlas yard. Their new Spring stock arrived this week, and it will pay you to look this over and compare prices. Joe Welch.

SERVICE TO AGRICULTURE

The one and only object of the Canadian Seed Growers' Association is to render a general service to agriculture in Canada by encouraging the production and general use of good seed with a view to maintaining high yields and good quality in the field products of commerce. This service is assisted by the Dominion Department of Agriculture.

The German wheat acreage is now slightly higher than in pre-war years and is tending higher.

FOR SALE OR TRADE—At Edmonton, Alberta, large building and four lots; suitable for garage or livery stable; sell for cash or trade for horses, cattle, car, etc.—Apply P. E. Woods, McBride, B.C.

WANTED—Advertiser wants Second-hand Baby Buggy. Must be in good shape and cheap. Leave word at The Star office or phone 45.

COMING EVENTS

Save your date for this Novelty affair of the season. Mr. R. G. Dunsmore will give a recital in the I.O.O.F. hall on Wednesday, March 21st. Admission 50c.

A silver tea will be held at St. Thomas' church on Thursday, March 8th from 3 to 6 p.m. in aid of the fund for supplies for the junior choir of that church.

Messrs. Benoit and Son are holding a big auction sale on their farm north of Fabyan on March 8th, when Bill Stuart will sell everything—lock, stock and barrel! See posters.

The St. Andrew's (Pres.) Ladies' Aid will hold their annual St. Patrick's Tea and Home Cooking Sale on Saturday, March 17, 1934, in the showrooms of the Brunner Garage on Main Street.

The United church W. A. have arranged to hold their annual daffodil Tea, etc. in the Brunner Service Station on the afternoon of March 31st next. Save the date.

The C. W. L. have now arranged to hold their sale of home cooking, apron sale, and afternoon tea in the I.O.O.F. hall on the afternoon of Saturday, March 31st. Save this date.

First Meeting of New Hospital Board

(Continued from page one)

The Chairman and Secretary be authorized to sign cheques, and that "Form LP-22" be signed as required by the Bank of Montreal—Carried.

Moved by Trustee Sutherland—That the regular meetings of the Board be held on the second Saturday of each month at the hour of one o'clock—Carried.

Moved by Trustee Gardner—That the matter of agreements be left until next meeting—Carried.

Moved by Trustee Sutherland—That correspondence as read be filed—Carried.

Moved by Trustee Gardner—That the Secretary inform Battle River M. D. that the Hospital Board are unable to guarantee the difference between the rate charged by the Wainwright hospital and the Royal Alexandra hospital in the case of the Ringage child—Carried.

Moved by Trustee Santee—That the Secretary ask the Department if "in case a ratpayer requiring hospitalization is unable to be admitted to the hospital on account of no room being available, and patient has to be taken to another hospital or home in which the cost is more than in the Wainwright hospital, do the Board have power to pay the extra costs?"—Carried.

Moved by Trustee Gould—That the rate of pay for Board members for attending meetings remain the same as in 1933—Carried.

Moved by Trustee Sutherland—That the accounts totalling \$813.49 be accepted and cheques issued to cover same—Carried.

Moved by Trustee Gardner—That Liability Insurance be taken out with a limit of \$5,000 for one person and \$15,000 for more than one person, and also an Owners', Landlords' and Tenants policy with a limit of \$5,000 for one person and \$10,000 for more than one person—Carried.

The matron's report which was then accepted on a motion by Trustee Santee was presented as follows:

Patients admitted during month 35
Patients discharged 38
Patients in hospital 10
Maternity cases 5
Infants born 5
Medical cases 23
Surgical cases 17
Major operations 6
Minor operations 6
Deaths 1
Total hospital days 288.

On motion the Board then adjourned.

DUNSMORE RECITAL TO BE EDUCATIONAL FEATURE

The Recital to be given in the I.O.O.F. hall on March 21st by Mr. R. G. Dunsmore was understood well as educational as well as entertaining.

Mr. Dunsmore informs us that he is making arrangements whereby all school children will have a chance to attend a full dress rehearsal at a very small admission fee, and high school students will be admitted at half price to the main performance.

The producer wishes to lend all possible encouragement to the younger element and demonstrate just what anyone can accomplish in their home locality by the exercise of a little effort.

Watch for full announcement next week.

WHY ALFALFA PROSPERED

Prior to the inspection of alfalfa seed crops by the Dominion Seed Branch and the sealing of the seed in sacks to protect the inspection tag certificate which includes the origin of production, the name of the variety, the grade of the seed, and the signature of the responsible inspector, alfalfa production in Canada was not at all general. Southern-grown imported seed of commerce was worse than useless for seedling in northern areas, but as soon as winter hardy alfalfa seed of assured variety and quality was made available, areas of alfalfa rapidly increased and alfalfa has become one of Canada's major crops for hay production.

The countries of the river Danube basin in Europe, in order of their importance in world wheat trade are Hungary, Yugoslavia, Roumania, and Bulgaria. Before the war they comprised one of the world's largest surplus areas.
